

The Relevium™ formula's main feature is its fast and reliable pain reduction along with suppressing of the inflammatory responses. This formula is interacting with the intracellular signaling and interrupting certain inflammatory pathways.

Relevium™ is targeting an overall health by reducing inflammation initiated by many factors, such as acute or chronic infections, hormonal abnormalities and a pro-inflammatory diet. It works for acute and chronic pain providing for significant improvement of quality of life.

An extremely weak emission of electromagnetic waves emitted by biological systems in the optical range of spectrum is known as a biophoton emission. This phenomenon is observed in all living cells of plants, animals and human beings. It cannot be seen by the naked eye but can be measured and recorded using a special equipment. It has been found that a biophoton emission is the steering mechanism behind all biochemical reactions.

Bio Resonance Technology (BRT) gives us a possibility to record a holographic image of the unique biophoton network that is characteristic for every existing herb or plant, enhance it substantially and after that "recorded" back to the carrier making its original healing qualities much stronger. This way BRT makes the best components that we use in our products, unbeatable. Using of BRT allows us to significantly increase the efficacy of the supplements, and reduce the dose of the formula.

INGREDIENTS:

Withania Somnifera (Ashwagandha), Boswellia Serrata (Sallaki), Vitex Negundo (Nirgundi), Turmeric (Curcumin), Sida Cordifolia (Bala), Turmeric (Haldi), Inositol, Isomalt

Withania Somnifera (Ashwagandha) is considered as pain reliever that acts on the nervous system to prevent pain signals from being sent. It's also thought to have some anti-inflammatory properties. One study found in the Indian Journal of Medical Research indicates strong potential of Ashwagandha as a treatment option for rheumatoid arthritis.

Vitex Negundo works well to provide relief from pain. It reduces pain and inflammation of the muscles and the joints caused due to injury as well as internal ailments. It works well to heal fractures too. The anti-bacterial, analgesic and anti-inflammatory property of Nirgundi makes it an excellent ingredient for healing wounds.

Boswellia, comes from the Boswellia Serrata tree, native to India. It's been used for thousands of years in Ayurveda and other traditional healing systems to treat conditions like arthritis, pain, fever, and heart disease. Studies suggest boswellic acids work by inhibiting the synthesis of a specific pro-inflammatory enzyme.

According to Ayurveda, **Bala** (Sida Cordifolia) oils are used topically to the sore muscles and sore joints in rheumatism and arthritis. The crushed leaves can be carried out a cataplasm to alleviate local pains and because of its astringent value for the cure of external wounds.

Curcumin, an active compound in Turmeric, is known for its antioxidant and anti-inflammatory activity that can promote healing. Studies have found that Turmeric may have pain-reducing power equal in some cases to that of prescription and over-the-counter medications.
